

Newsletter #6: Latest Backplane Version Launched

Welcome to the sixth edition of the i3-MARKET newsletter!

The Coordinators' Foreword

i3-MARKET Backplane Updated

Following the 2022 public release of the Backplane, i3-MARKET partners have been working on updating the components based upon community feedback.

In this edition you can learn about the updates, the latest events of the project and the goals for the final few months.

i3-MARKET Backplane Release v2.5

The i3-MARKET Backplane has received an updated release, now available on our [Developers Platform](#). The latest version has updated several components. Full changes can be seen in the project Github. As the software is updated, i3-MARKET will release new versions, which will be detailed via the Open Source platform and release notes.

i3-MARKET Hosted Workshop at IoT Conference 2022

i3-MARKET coordinator Insight Centre hosted a workshop at the IoT Conference 2022 in Delft, NL. The workshop presenters discussed how interoperability of data can help power the IoT world and the current challenges in creating interoperability; in particular how semantic approaches can help overcome said challenges.

i3-MARKET Technical Meeting in Athens

i3-MARKET partners met in Athens for a technical integration meeting in December. The meeting allowed for greater focus on integrating the pilots and for partners to experience some December sun! Thanks to partner Athens University of Economics and Business for hosting!
